## Education

**Rhode Island School of Design** | BFA Industrial Design | 1999 – 2002

**New Mexico State University** | Fine Arts | 1993 – 1998

**Reed College** | Political Science | 1990 – 1991

## Core Identity

I produce creative solutions that connect stakeholders and systems adeptly towards the expert and meaningful engagement of collaboration for the greater good.

## Objective

I want to join a team of people who are intentional about creating a culture of work that fosters collaboration and actively practices deep listening and goodwill.

## Skill Set

**PROJECT DIRECTION:** 15 years of experience managing local and distributed virtual teams. 7 years experience with various permutations of Agile development practices. A deep systems-based methodology/approach for merging technology with organizational enterprises.

**DRUPAL:** End to end experience including custom module development, responsive theme development, and drupal version upgrades (from drupal 6 to 8) for complex sites including custom module and theme retrofitting.

**DATABASE:** 14 years of experience developing data management systems on a variety of platforms ranging from FileMaker/Access to Oracle to web-based MySQL database applications.

**WEB:** 12 years of experience with drupal and the development of custom web applications using open source content management systems.  
Expert: PHP, MYSQL, CSS, HTML, git, drush, docker, composer, LESS/SASS, Behat, Drupal 6-8, module development.  
Intermediate: JavaScript/Jquery, themeing.

## Blog

[http://www.jellobrain.com/tech\\_blog](http://www.jellobrain.com/tech_blog)

This is a blog where I write about mostly technical subjects.

## Experience

### **Entrepreneur/Web-Developer | jellobrain | 1998 – current**

My business, jellobrain, has morphed over the years, but has consistently focused on web and technology applications for nonprofit organizations and acting both as an advisor and as a full spectrum web development shop.

### **Engineer | CivicActions | 2015 – 2017**

Team player in a drupal development shop that truly practices agile/scrum. I worked on large scale Government projects, and medium to large scale non-profit Enterprise level projects. I love my coworkers, I love the organization I worked for. If you are getting a resume from me, it is because Government work is not my favorite flavor of Koolaide, and I'm looking for more particularly interesting projects.

### **Technical Lead | TechSoup Global | 2010 --2012**

Technical Lead for a distributed global team of developers and stakeholders developing a social network platform on drupal that enables nonprofit organizations and activists to access technology and development projects/money. Also maintained and developed other platforms for the organization.

### **Web Developer / Advisor | Alternate ROOTS | 2009 - 2011**

Developed and designed, from the ground up, a multidimensional web application / data management system for the organization using drupal, and acted in an advisory role once development stabilized.

### **Director IT | Southern Center for Human Rights | 2007 - 2009**

Developed virtual office website on drupal for collaboration between a distributed team of lawyers and organizers. Also developed their main website and managed the implementation of their development database.

### **Project Manager | United States Social Forum | 2006 --2007**

Served as a project manager for distributed team developing event management systems, registration systems and website for the United States Social Forum.

### **Database Specialist | Institute of American Indian Arts | 2006 - 2007**

Managed, implemented and organized database conversion from a legacy Matriculation and Data Management Systems to an Oracle-based system (EMPOWER).

### **Information Systems Designer | Bioneers | 2004 - 2006**

Managed, implemented and organized a database conversion from legacy FileMaker Event Management and Organizational Data Management Systems to a custom webbased drupal/CiviCRM implementation. Managed the development of first ever CiviNode bridge.

### **Assistant Dean | EcoVersity | 2002 - 2004**

Managed the operations of a vocational school that taught environmentally conscious and sustainable technologies. Assisted with curriculum development, database management and website.
